

**Title: TENTACLES**

**Author: Roland Smith**

**SUMMARY:**

I'm going to share with you a book I've read called "Tentacles".

Hmm... Tentacles... Tentacles from an octopus or a squid? What? Is it a science book? Nice guess. It's actually a science fiction. I'm always a squid guy. That's why I'm attracted to the title in the first place.

Let me tell you a bit more about the book. It's a thrilling adventure! It begins as a group of scientists board a haunted ship in order to capture a giant squid alive! During the voyage, the scientists want to study the giant squid captured previously. However, some villains are trying to steal the squid because of fame and honour. They want to tell the world that it's their effort in capturing such a huge mythical creature. Fortunately, the protagonists successfully stop the villains in their evil plan and earn themselves a chance to contribute to the science field.

**REFLECTION:**

I think that the whole story is very action-packed and intriguing. What I liked about this book is that it ends with a cliffhanger. It keeps you thinking about what will happen in the trilogy. Also, both the title, and the subtitles are very attention grabbing. For example, one of the subtitles is called 'The orb'. It just gives you a question like: what is the orb?

I think the most action-packed scene is when they try to capture a giant squid alive, mostly because I have always had interest in squids but also because there was a thrilling brawl between the giant squid and wait ... no spoilers! You just have to see for yourself.

My favorite character has got to be the protagonist, Marty O'Hara, as he is the owner of a drone named Dragonspy. I've always wanted to learn how to fly a drone. The way Marty flies it so effortlessly just makes me so jealous.

I would definitely read the whole series if I had the chance to. I would definitely recommend this book to everyone. If you want to take a look at the series, Cryptid Hunters, and this book, Tentacles, they can be borrowed at the Tuen Mun Public Library. Thank you.
