(Session B):

6 August – 9 August 2019

Time

9:30 - 17:00

Venue

THEi Tsing Yi campus

Why joining the MIT X THEi STEM Summer Camp 2019

With the support of students from the Massachusetts Institute of Technology (MIT), THEi will organise two 4-day summer camps for secondary 2 to 4 students to acquire a unique out-of-classroom experience, to enhance their problem-solving and communication skills, as well as to learn the latest interdisciplinary knowledge across STEM disciplines on topics related to applied science, engineering, technology and innovation, etc. There will also be a sharing on studying in the US. Topics include introduction to the US higher education system, and tips for preparing college essays and attending admissions interviews.

Summer Camp Highlights

- Experience STEM Education via practical workshops and fun-filled activities delivered by MIT and THEi students.
- Explore different subject areas on topics that may include **Bottle Rockets, Artificial Intelligence, Virtual Reality, Web Development, Waves and Dynamics, Renewable Energy, Smart Home and Finding Carbon Footprints** (*tentative, to be confirmed in May*).
- Enhance communication skills in English through a variety of academic, cultural and social activities.
